

## Graphic Designer

### ABOUT

My name is Chris Jackson. I'm smart, but not full of myself, talented, but down to earth, and dedicated to my passion for design and love for typography. A keen eye for color and an ability to apply an uncanny amount of detail prevails through all my work. I can create fresh layouts, well-suited branding, and pixel-perfect web designs because I understand how to research and explore creative ways to solve a problem.
